Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 40-64 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hood (5,935,143). Hood appears to show the elements of the claims. For example, and with reference to claim 40, Hood teaches a first and a second straight portion of an ultrasonic blade (left and right sides of the top portions of the blade illustrated in Fig 2, for example) connected to each other via a curved portion at the very top of the figure. With reference to Fig 4a, one possible configuration of the cutting edge is shown to comprise first and second curved surfaces 47 (note column 6 line 49). As also required in the claim, these curved surfaces are curved about some axes and the blade body is defined about some body axes. The blade of Hood is also considered to be inherently capable of all of the functions recited in the claims, such as use to cut a composite prepreg (claim 49) and use to cut a titanium graphite composite (claim 58).

Based on the teaching in the relevant sections of Hood, it would also have been obvious to curve the first and second surfaces outwardly (convexly) to achieve a different cutting effect. Also based on the teaching of Hood elements of some dependent claims later deemed not to be

shown would have been obvious modifications to the reference, for the purpose of improving the cutting performance of the blade.

4. Applicant's arguments filed on 8/31/2007 have been fully considered but they are not persuasive. Applicant argues that hood does not show a cambered or curved surface extending from a first side to a second side of the blade body and defining a cutting edge. Yet as set forth in the rejection Hood does show these elements.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob K. Ackun Jr. whose telephone number is (571)272-4418. The examiner can normally be reached on Monday through Friday 8.30AM-5.00PM.
